

Determine HIV-1/2 Ag/Ab Combo

HIV-1/2 HIV-1/2 Combo
HBsAg Syphilis TP

Accurate and rapid diagnosis of sexually transmitted diseases (STDs) is a major global public health priority, especially in the developing world. Since the emergence of HIV/AIDS, it has become even more critical to diagnose STDs early, not only to save lives but also to prevent the spread of life-threatening infections.

The answer is accurate, easy and innovative technology from Inverness Medical. Scientifically engineered for dynamic performance anywhere in the world, Determine® allows the detection of the causative organisms of hepatitis B, HIV/AIDS and syphilis to be undertaken simply, accurately and within just 15 minutes.

The simple two step tests require no power, no water, minimal training, just a fingerstick for sample collection and can be easily stored and transported.
